VISUALIZATION OF TIME SERIES DATA

WHAT IS TIME SERIES DATA?

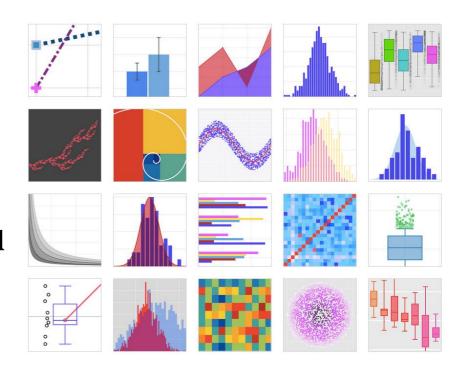

A time series is a sequence of data points, typically consisting of successive measurements made over a time interval.

VISUALIZATION OF TIME SERIES DATA

PLOTLY

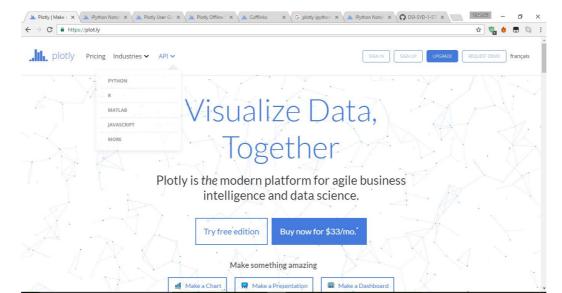

• Is an online analytics and data visualization tool.

 Plotly provides online graphing, analytics, and statistics tools for individuals and collaboration, as well as scientific graphing libraries for Python, R, MATLAB, Perl, Julia, Arduino, and REST.

GETTING STARTED WITH PLOTLY

- I. (sudo) pip install plotly -> pip install plotly --upgrade
- 2. Create an account at https://plot.ly/

VISUALIZATION OF TIME SERIES DATA

GETTING STARTED WITH PLOTLY...

```
import plotly
plotly.tools.set_credentials_file(username='Your_UserName',
                                                                  api key='Your API Key')

▲ Plotly | Max  
▲ Plotly Use x  
▲ Getting St x  
○ execersice x  
○ Plotly Get x  
○ Visualizate x
                                                                                                               C https://plot.ly/settings/api
                                                                                                           .III. plotly
                                                                                                                                                                                          + Create
                                                                                                                                                                                                    Your_USERNAME V
                                                                                                                                            API SETTINGS
                                                                                                                                           USERNAME
                                                                                                                                            The same as your Plotly username
                                                                                                                                             Your USERNAME
                                                                                                              Your USERNAME
                                                                                                                                           API KEY
                                                                                                                                            Note that generating a new API key will require changes to your ~/.plotly/.credentials file.
                                                                                                                                             .....
                                                                                                            PROFILE
                                                                                                            PASSWORD
                                                                                                            SUBSCRIPTION
                                                                                                            API KEYS
                                                                                                                                           Use one streaming token per data-stream. Check out the documentation to learn more about the
                                                                                                            MAPBOX ACCESS TOKENS
